

# Activated Charcoal Filter

Filter dedicated to deodorization,  
fully filled with activated charcoal

Deodorization

## Efficiency

## USE

- Air purifiers
- Cigarette smoke extracting machine etc.

## Features

- **Feature1** Filling with large amount of activated charcoal, powerful deodorization capabilities come true

- **Feature2** Customize to an optimal specification according to the use

Using the special impregnated charcoal according to the use, we can cope with various odors. Such as specialization to the deodorization of Kitchen Odors, Cigarette Odors and so on. Please feel free to tell us your request.

### <Target odors>

Cigarette odors: Acetaldehyde/Ammonia/Acetic Acid  
Toilet odors: Methyl mercaptan/Tri-methyl amine/Ammonia  
Exhaust gas: Nitrogen oxide(NOx)/Sulfur oxide(SOx)/Butane

Garbage Odors: Methyl sulfide/Hydrogen sulfide/Tri-methyl amine  
VOCs contained in new building material: Formaldehyde/  
Toluene/Xylene  
Other foul odor gases: Isovaleric acid etc.

### Capabilities example of customized filter

In the case of...  
Filter size: 370×230×10(mm)  
Activated charcoal: 170g filled

Test items	Filter capabilities
Initial deodorization(JEM1467)	100%
Durability(JEM1467)	More than 10 years
Initial pressure drop	25Pa(5m <sup>3</sup> /min)
Amount of activated charcoal	170g

The data above is for a reference, and this doesn't guarantee a specification of a product.
